# REMOTE SENSING AND GIS IN IRRIGATION WATER MANAGEMENT

VDM Verlag Sep 2009, 2009. Taschenbuch. Book Condition: Neu. 222x152x18 mm. Neuware - Irrigation is the largest consumer of water resources for securing food. Unless the irrigation water managed properly we will be under the threat of water shortage. Conventional approaches show limitations and therefore new approaches such as remote sensing are required. Recently scientists and researchers have shown incredible interest in using earth observation satellites to better understand the interaction between the atmosphere and earth surface and consequently better...
